Subject index

Volume 297 (2000)

N-Acetyl-β-D-glucosaminidase; Urinary enzymes; Alanine aminopeptidase; Tubular dysfunction; Glomerulonephritis; α_1-microglobulin **297**, 93

Alanine aminopeptidase; Enkephalinase; Kidney metalloproteinases; Renal diseases (acute toxic tubulointerstitial nephropathy); Urinary enzymes; Urinary proteins **297**, 103

Alanine aminopeptidase; Urinary enzymes; *N*-Acetyl-β-D-glucosaminidase; Tubular dysfunction; Glomerulonephritis; α_1-microglobulin **297**, 93

Albuminuria; Hydronephrosis; Reflux; Proteinuria; α-1-Microglobulin **297**, 183

Analytical quality specifications; Urinalysis; Test strips; Microscopy; Bacterial culture; Standardization **297**, 305

Ancient and modern concepts of science; Uroscopy; Birth of clinical chemistry; Social implications of scientific progress; History of doctor/patient relationship **297**, 5

Aspirin; Epinephrine; Norepinephrine; Interference; Tetracycline; Paracetamol **297**, 217

Bacterial culture; Urinalysis; Test strips; Microscopy; Analytical quality specifications; Standardization **297**, 305

Battery of tests; Biomarkers; Nephrotoxicity; Sequence of kidney damage; Early markers; Urine analysis **297**, 173

Biomarkers; Nephrotoxicity; Sequence of kidney damage; Early markers; Urine analysis; Battery of tests **297**, 173

Birth of clinical chemistry; Uroscopy; Ancient and modern concepts of science; Social implications of scientific progress; History of doctor/patient relationship **297**, 5

Bladder neoplasm; Tumor marker; Transitional cell carcinoma; Urine; Diagnosis; Prognosis **297**, 191

Clearance; Glomerular filtration rate; Endogenous marker; Low molecular weight proteins; Cystatin C **297**, 55

Creatinine adjustment; Expert system; Urinary protein pattern analysis; Incidence of tubular proteinuria; Retinol-binding protein; Glomerular selectivity **297**, 261

Creatinine clearance; Cystatin C; Metastatic disease; GFR; Renal transplant; Specific **297**, 67

Cystatin C; Glomerular filtration rate; Endogenous marker; Clearance; Low molecular weight proteins **297**, 55

Cystatin C; Metastatic disease; GFR; Creatinine clearance; Renal transplant; Specific **297**, 67

Cytokines; Diabetic nephropathy; Tubular marker proteins; Matrix proteins; Molecular mechanism **297**, 135

PII: S0009-8981(00)00304-1

Decision support; Urine protein; Evaluation; Knowledge-based system; Expert system **297**, 251

Diabetes mellitus; History; Glucose; Venice; Giovanni Bizio; Giacinto Namias **297**, 17

Diabetic nephropathy; Tubular marker proteins; Matrix proteins; Cytokines; Molecular mechanism **297**, 135

Diagnosis; Bladder neoplasm; Tumor marker; Transitional cell carcinoma; Urine; Prognosis **297**, 191

Digitised microscope images; Urinary sediment; Renal diagnosis **297**, 225

Disease activity; Urinary macrophage; Protein-loading tubulopathy; Lipid-laden macrophages **297**, 123

Early markers; Biomarkers; Nephrotoxicity; Sequence of kidney damage; Urine analysis; Battery of tests **297**, 173

Electrophoresis; Proteinuria; Single protein determination **297**, 163

Endemic nephropathy; Tubulointerstitial lesion; Excretion pattern of α_1-microglobulin and albumin **297**, 85

Endogenous marker; Glomerular filtration rate; Clearance; Low molecular weight proteins; Cystatin C **297**, 55

Enkephalinase; Kidney metalloproteinases; Renal diseases (acute toxic tubulointerstitial nephropathy); Alanine aminopeptidase; Urinary enzymes; Urinary proteins **297**, 103

Epinephrine; Norepinephrine; Interference; Tetracycline; Aspirin; Paracetamol **297**, 217

Evaluation; Urine protein; Knowledge-based system; Expert system; Decision support **297**, 251

Excretion pattern of α_1-microglobulin and albumin; Endemic nephropathy; Tubulointerstitial lesion **297**, 85

Expert system; Urinary protein pattern analysis; Creatinine adjustment; Incidence of tubular proteinuria; Retinol-binding protein; Glomerular selectivity **297**, 261

Expert system; Urine protein; Evaluation; Knowledge-based system; Decision support **297**, 251

External quality assessment; Inter-laboratory performance; Quality control; Urinary analysis **297**, 285

Functional proteinuria; Orthostatism; Stress tolerance test, SDS–PAGE **297**, 145

GFR; Cystatin C; Metastatic disease; Creatinine clearance; Renal transplant; Specific **297**, 67

Giacinto Namias; History; Diabetes mellitus; Glucose; Venice; Giovanni Bizio **297**, 17

Giovanni Bizio; History; Diabetes mellitus; Glucose; Venice; Giacinto Namias **297**, 17

Glomerular disease; α_2-Macroglobulin; IgG; IgM; Proteinuria; Proteinuria selectivity index **297**, 73

Glomerular filtration rate; Endogenous marker; Clearance; Low molecular weight proteins; Cystatin C **297**, 55

Glomerular selectivity; Expert system; Urinary protein pattern analysis; Creatinine adjustment; Incidence of tubular proteinuria; Retinol-binding protein **297**, 261

Glomerulonephritis; Urinary enzymes; Alanine aminopeptidase; *N*-Acetyl-β-D-glucosaminidase; Tubular dysfunction; α_1-microglobulin **297**, 93

Glucose; History; Diabetes mellitus; Venice; Giovanni Bizio; Giacinto Namias **297**, 17

Harmonization; Quality management; Standardization; Urinalysis; Urinary proteins; Reference material **297**, 239

History; Diabetes mellitus; Glucose; Venice; Giovanni Bizio; Giacinto Namias **297**, 17

History of doctor/patient relationship; Uroscopy; Birth of clinical chemistry; Ancient and modern concepts of science; Social implications of scientific progress **297**, 5

Hydronephrosis; Reflux; Proteinuria; Albuminuria; α-1-Microglobulin **297**, 183

IgG; α_2-Macroglobulin; Glomerular disease; IgM; Proteinuria; Proteinuria selectivity index **297**, 73

IgM; α_2-Macroglobulin; Glomerular disease; IgG; Proteinuria; Proteinuria selectivity index **297**, 73

Immunonephelometry; Retinol binding protein **297**, 155

Incidence of tubular proteinuria; Expert system; Urinary protein pattern analysis; Creatinine adjustment; Retinol-binding protein; Glomerular selectivity **297**, 261

Inter-laboratory performance; External quality assessment; Quality control; Urinary analysis **297**, 285

Interference; Epinephrine; Norepinephrine; Tetracycline; Aspirin; Paracetamol **297**, 217

Interlaboratory surveys; Urine analysis; Quality assessments **297**, 275

Interstitial fibrosis; Proteinuria; Renal disease; Protein type **297**, 43

Kidney; Tubulointerstitium; Proteinuria; Progression of renal disease; Renin–angiotensin system inhibition; Renoprotection **297**, 29

Kidney metalloproteinases; Enkephalinase; Renal diseases (acute toxic tubulointerstitial nephropathy); Alanine aminopeptidase; Urinary enzymes; Urinary proteins **297**, 103

Knowledge-based system; Urine protein; Evaluation; Expert system; Decision support **297**, 251

Lipid-laden macrophages; Urinary macrophage; Disease activity; Protein-loading tubulopathy **297**, 123

Low molecular weight proteins; Glomerular filtration rate; Endogenous marker; Clearance; Cystatin C **297**, 55

α_2-Macroglobulin; Glomerular disease; IgG; IgM; Proteinuria; Proteinuria selectivity index **297**, 73

Matrix proteins; Diabetic nephropathy; Tubular marker proteins; Cytokines; Molecular mechanism **297**, 135

Metastatic disease; Cystatin C; GFR; Creatinine clearance; Renal transplant; Specific **297**, 67

α-1-Microglobulin; Hydronephrosis; Reflux; Proteinuria; Albuminuria **297**, 183

α_1-Microglobulin; Urinary enzymes; Alanine aminopeptidase; *N*-Acetyl-β-D-glucosaminidase; Tubular dysfunction; Glomerulonephritis **297**, 93

Microscopy; Urinalysis; Test strips; Bacterial culture; Analytical quality specifications; Standardization **297**, 305

Molecular mechanism; Diabetic nephropathy; Tubular marker proteins; Matrix proteins; Cytokines **297**, 135

Nephrotoxicity; Biomarkers; Sequence of kidney damage; Early markers; Urine analysis; Battery of tests **297**, 173

Nitration; Reactive oxygen species; Reactive nitrogen species; Superoxide dismutase **297**, 207

Norepinephrine; Epinephrine; Interference; Tetracycline; Aspirin; Paracetamol **297**, 217

Orthostatism; Functional proteinuria; Stress tolerance test, SDS--PAGE **297**, 145

Paracetamol; Epinephrine; Norepinephrine; Interference; Tetracycline; Aspirin **297**, 217

Prognosis; Bladder neoplasm; Tumor marker; Transitional cell carcinoma; Urine; Diagnosis **297**, 191

Progression of renal disease; Kidney; Tubulointerstitium; Proteinuria; Renin–angiotensin system inhibition; Renoprotection **297**, 29

Protein type; Proteinuria; Renal disease; Interstitial fibrosis **297**, 43

Protein-loading tubulopathy; Urinary macrophage; Disease activity; Lipid-laden macrophages **297**, 123

Proteinuria; Electrophoresis; Single protein determination **297**, 163

Proteinuria; Hydronephrosis; Reflux; Albuminuria; α-1-Microglobulin **297**, 183

Proteinuria; Kidney; Tubulointerstitium; Progression of renal disease; Renin–angiotensin system inhibition; Renoprotection **297**, 29

Proteinuria; Renal disease; Interstitial fibrosis; Protein type **297**, 43

Proteinuria; α_2-Macroglobulin; Glomerular disease; IgG; IgM; Proteinuria selectivity index **297**, 73

Proteinuria selectivity index; α_2-Macroglobulin; Glomerular disease; IgG; IgM; Proteinuria **297**, 73

Quality assessments; Urine analysis; Interlaboratory surveys **297**, 275

Quality control; External quality assessment; Inter-laboratory performance; Urinary analysis **297**, 285

Quality management; Standardization; Harmonization; Urinalysis; Urinary proteins; Reference material **297**, 239

Reactive nitrogen species; Reactive oxygen species; Superoxide dismutase; Nitration **297**, 207

Reactive oxygen species; Reactive nitrogen species; Superoxide dismutase; Nitration **297**, 207

Reference material; Quality management; Standardization; Harmonization; Urinalysis; Urinary proteins **297**, 239

Reflux; Hydronephrosis; Proteinuria; Albuminuria; α-1-Microglobulin **297**, 183

Renal diagnosis; Urinary sediment; Digitised microscope images **297**, 225

Renal disease; Proteinuria; Interstitial fibrosis; Protein type **297**, 43

Renal diseases (acute toxic tubulointerstitial nephropathy); Enkephalinase; Kidney metalloproteinases; Alanine aminopeptidase; Urinary enzymes; Urinary proteins **297**, 103

Renal transplant; Cystatin C; Metastatic disease; GFR; Creatinine clearance; Specific **297**, 67

Renin–angiotensin system inhibition; Kidney; Tubulointerstitium; Proteinuria; Progression of renal disease; Renoprotection **297**, 29

Renoprotection; Kidney; Tubulointerstitium; Proteinuria; Progression of renal disease; Renin–angiotensin system inhibition **297**, 29

Retinol binding protein; Immunonephelometry **297**, 155

Retinol-binding protein; Expert system; Urinary protein pattern analysis; Creatinine adjustment; Incidence of tubular proteinuria; Glomerular selectivity **297**, 261

Sequence of kidney damage; Biomarkers; Nephrotoxicity; Early markers; Urine analysis; Battery of tests **297**, 173

Single protein determination; Electrophoresis; Proteinuria **297**, 163

Social implications of scientific progress; Uroscopy; Birth of clinical chemistry; Ancient and modern concepts of science; History of doctor/patient relationship **297**, 5

Specific; Cystatin C; Metastatic disease; GFR; Creatinine clearance; Renal transplant **297**, 67

Standardization; Quality management; Harmonization; Urinalysis; Urinary proteins; Reference material **297**, 239

Standardization; Urinalysis; Test strips; Microscopy; Bacterial culture; Analytical quality specifications **297**, 305

Stress tolerance test, SDS–PAGE; Orthostatism; Functional proteinuria **297**, 145

Superoxide dismutase; Reactive oxygen species; Reactive nitrogen species; Nitration **297**, 207

Test parameters; Urinalysis; Test strip **297**, 297

Test strip; Urinalysis; Test parameters **297**, 297

Test strips; Urinalysis; Microscopy; Bacterial culture; Analytical quality specifications; Standardization **297**, 305

Tetracycline; Epinephrine; Norepinephrine; Interference; Aspirin; Paracetamol **297**, 217

Transitional cell carcinoma; Bladder neoplasm;

Tumor marker; Urine; Diagnosis; Prognosis **297**, 191

Tubular dysfunction; Urinary enzymes; Alanine aminopeptidase; *N*-Acetyl-β-D-glucosaminidase; Glomerulonephritis; α_1-microglobulin **297**, 93

Tubular marker proteins; Diabetic nephropathy; Matrix proteins; Cytokines; Molecular mechanism **297**, 135

Tubulointerstitial lesion; Endemic nephropathy; Excretion pattern of α_1-microglobulin and albumin **297**, 85

Tubulointerstitium; Kidney; Proteinuria; Progression of renal disease; Renin–angiotensin system inhibition; Renoprotection **297**, 29

Tumor marker; Bladder neoplasm; Transitional cell carcinoma; Urine; Diagnosis; Prognosis **297**, 191

Urinalysis; Quality management; Standardization; Harmonization; Urinary proteins; Reference material **297**, 239

Urinalysis; Test strip; Test parameters **297**, 297

Urinalysis; Test strips; Microscopy; Bacterial culture; Analytical quality specifications; Standardization **297**, 305

Urinary analysis; External quality assessment; Inter-laboratory performance; Quality control **297**, 285

Urinary enzymes; Alanine aminopeptidase; *N*-Acetyl-β-D-glucosaminidase; Tubular dysfunction; Glomerulonephritis; α_1-microglobulin **297**, 93

Urinary enzymes; Enkephalinase; Kidney metalloproteinases; Renal diseases (acute toxic tubulointerstitial nephropathy); Alanine aminopeptidase; Urinary proteins **297**, 103

Urinary macrophage; Disease activity; Protein-loading tubulopathy; Lipid-laden macrophages **297**, 123

Urinary protein pattern analysis; Expert system; Creatinine adjustment; Incidence of tubular proteinuria; Retinol-binding protein; Glomerular selectivity **297**, 261

Urinary proteins; Enkephalinase; Kidney metalloproteinases; Renal diseases (acute toxic tubulointerstitial nephropathy); Alanine aminopeptidase; Urinary enzymes **297**, 103

Urinary proteins; Quality management; Standardization; Harmonization; Urinalysis; Reference material **297**, 239

Urinary sediment; Digitised microscope images; Renal diagnosis **297**, 225

Urine; Bladder neoplasm; Tumor marker; Transitional cell carcinoma; Diagnosis; Prognosis **297**, 191

Urine analysis; Biomarkers; Nephrotoxicity; Sequence of kidney damage; Early markers; Battery of tests **297**, 173

Urine analysis; Interlaboratory surveys; Quality assessments **297**, 275

Urine protein; Evaluation; Knowledge-based system: Expert system; Decision support **297**, 251

Uroscopy: Birth of clinical chemistry; Ancient and modern concepts of science; Social implications of scientific progress; History of doctor/patient relationship **297**, 5

Venice; History; Diabetes mellitus; Glucose; Giovanni Bizio; Giacinto Namias **297**, 17
